

Chord Inversion Workout

Here is a great workout for learning chords in different inversions on the guitar. This is absolutely essential to learn if you want to play solo guitar tunes. And as a general rule these are things you should know just to be a better player. I've only given you 2 chords: CM7 and Cm7. Each has 4 inversions. These are all on the inside 4 strings on the guitar. See if you can learn these and then work out more of your own. But --- be sure to learn these first.
